

# N-TIME™ FEATURE COMPARISON

## Web & Mobile

N-Time™ ingests and analyzes satellite imagery of your fields to provide nitrogen application recommendations throughout the growing season.

In addition to accessing N-Time™ on the web, users can utilize N-Time™ insights anytime, anywhere on the Sentinel CMS mobile application. The mobile version of N-Time™ complements the features of N-Time™ for web. The chart below shows features shared by web and mobile, as well as features specific to each version of N-Time™.
